

Session 2-7 Enhanced ERD

Kyunghee Lee, PhD

WAYNE STATE
Mike Ilitch School of Business

Enhanced ER (EER) Model

- The model that has resulted from extending the original ER model with new modeling constructs
 - Supertype / subtype relationship
 - Constraints in supertype/subtype relationships
 - Entity clustering

WAYNE STATE

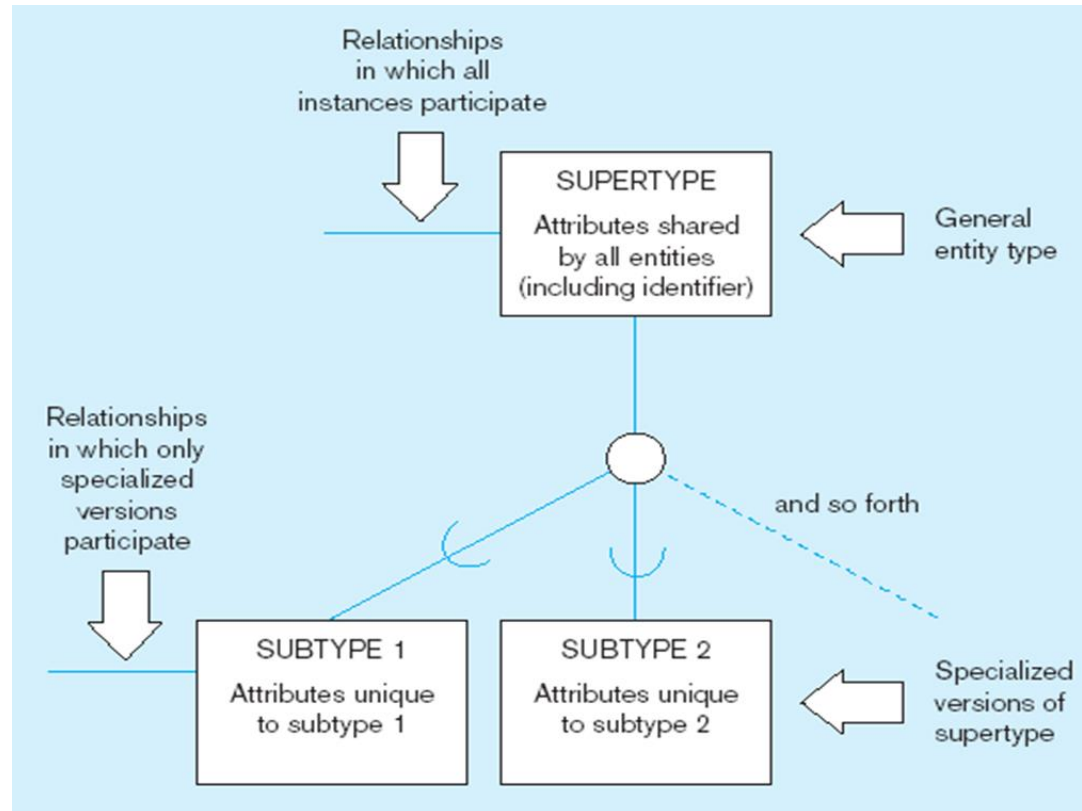

Mike Ilitch School of Business

Supertypes and Subtypes

- Supertype: A general entity type
- Subtype: A subgrouping of the entities in an entity type (specialized entities) that has attributes distinct from those in other subgroupings
- Attribute inheritance
 - Subtype entities inherit values of all attributes and instances of all relationships of the supertype

Basic EER Notation for Supertype and Subtype

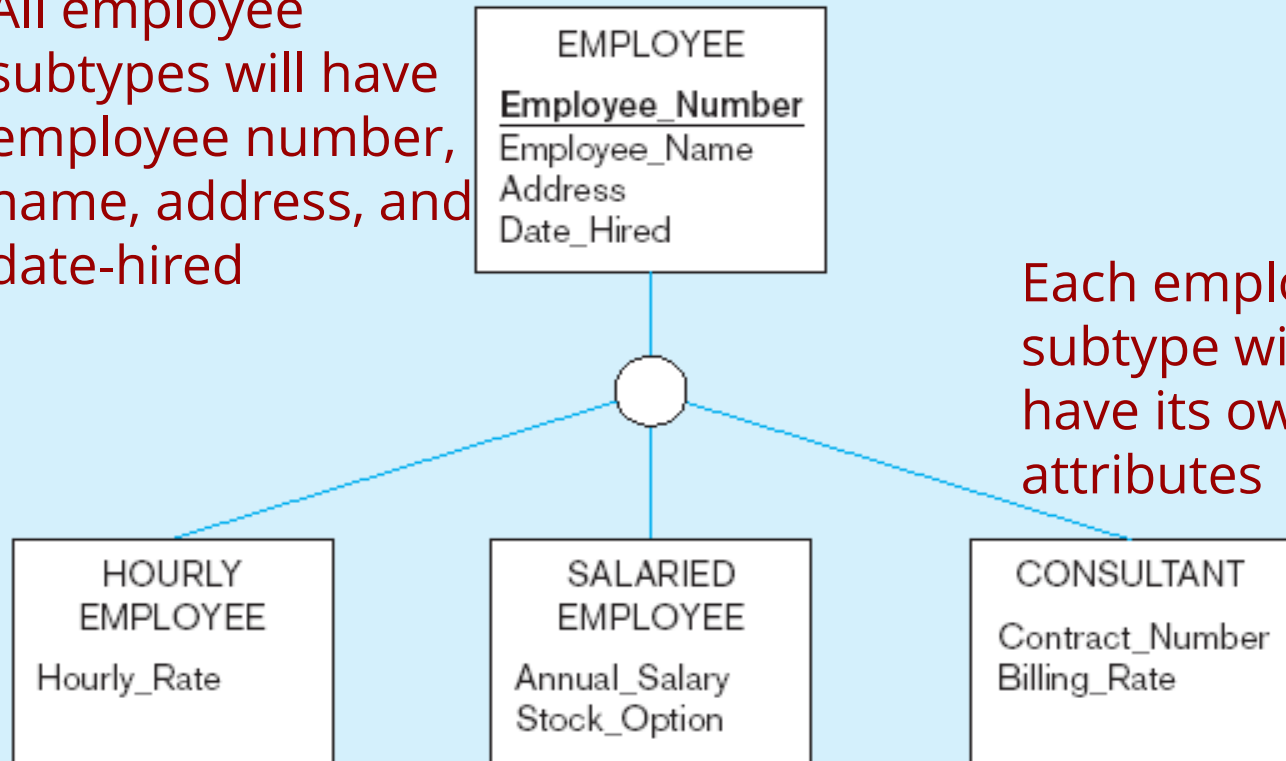

WAYNE STATE

Mike Ilitch School of Business

Employee Supertype with Three Subtypes

All employee subtypes will have employee number, name, address, and date-hired

Each employee subtype will also have its own attributes

WAYNE STATE

Mike Ilitch School of Business

When to Use Supertype/Subtype?

- When there are **attributes** that apply to some (but not all) instances of an entity type
- When the instances of a subtype participate in a **relationship** unique to that subtype.

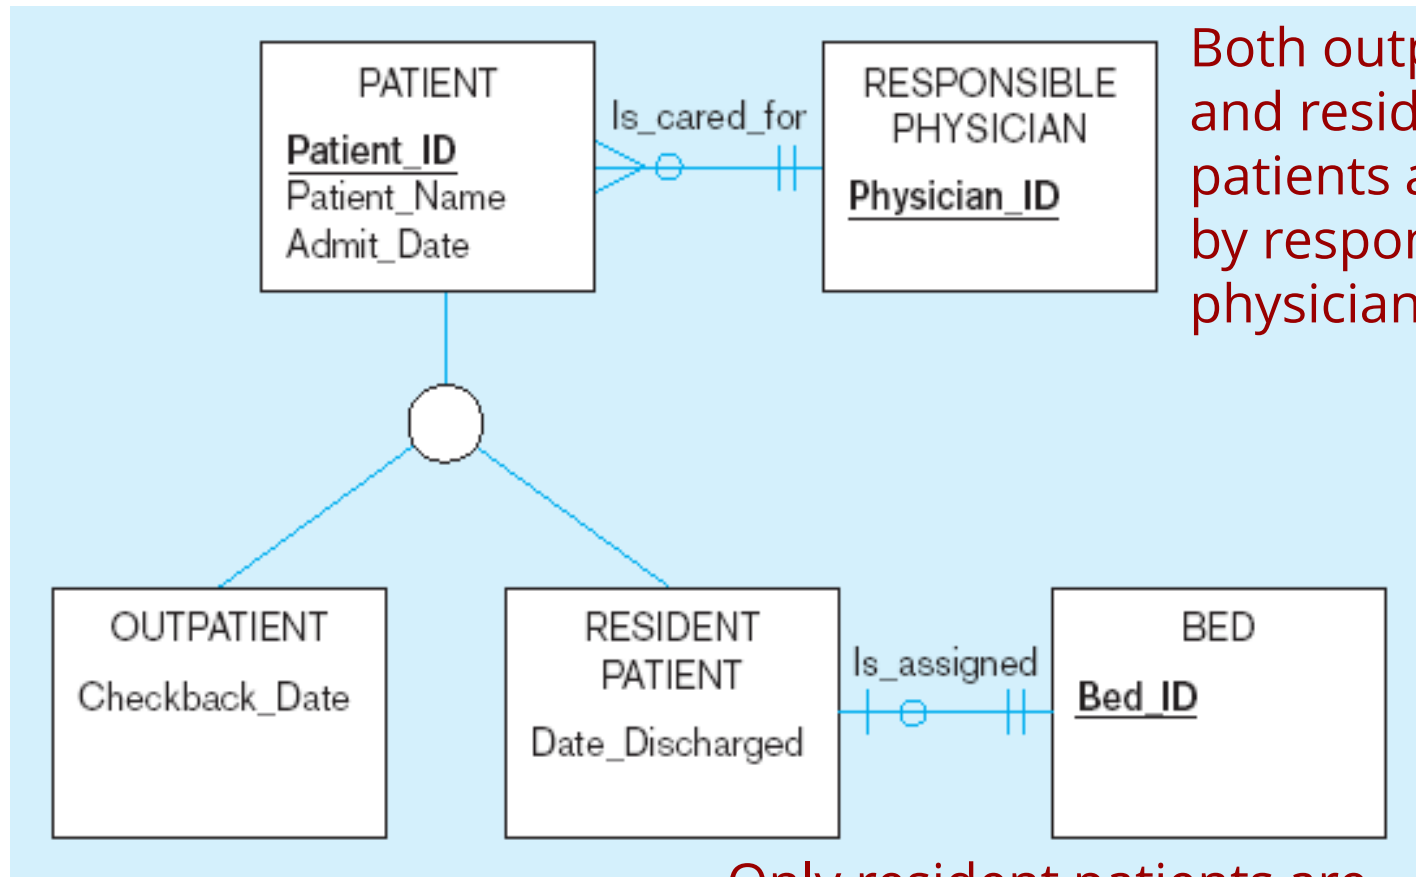

Relationships and Subtypes

- Relationships at the **supertype** level indicate that **all subtypes** will participate in the relationship
- The instances of a **subtype** may participate in a relationship **unique to that subtype**. In this situation, the relationship is shown at the subtype level

Supertype/Subtype in a Hospital

Both outpatients and resident patients are cared by responsible physicians

Only resident patients are assigned to beds

Generalization and Specialization

- Generalization (Bottom-up)
 - The process of defining a more general entity type from a set of more specialized entity types
- Specialization (Top-down)
 - The process of defining one or more subtypes of the supertype and forming supertype/subtype relationships

Generalization

- CAR, TRUCK, and MOTORCYCLE

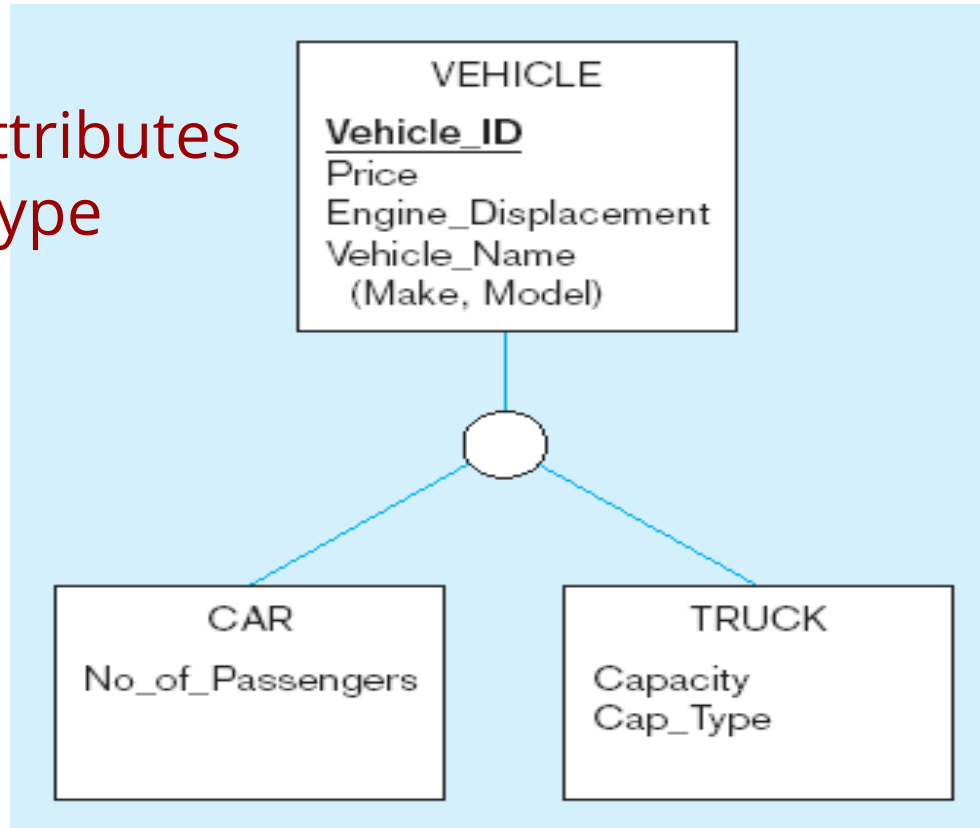

CAR	TRUCK	MOTORCYCLE
<u>Vehicle_ID</u>	<u>Vehicle_ID</u>	<u>Vehicle_ID</u>
Price	Price	Price
Engine_Displacement	Engine_Displacement	Engine_Displacement
Vehicle_Name (Make, Model)	Vehicle_Name (Make, Model)	Vehicle_Name (Make, Model)
No_of_Passengers	Capacity Cab_Type	

All three types have common attributes

Generalization (cont'd)

Shared attributes
in Supertype

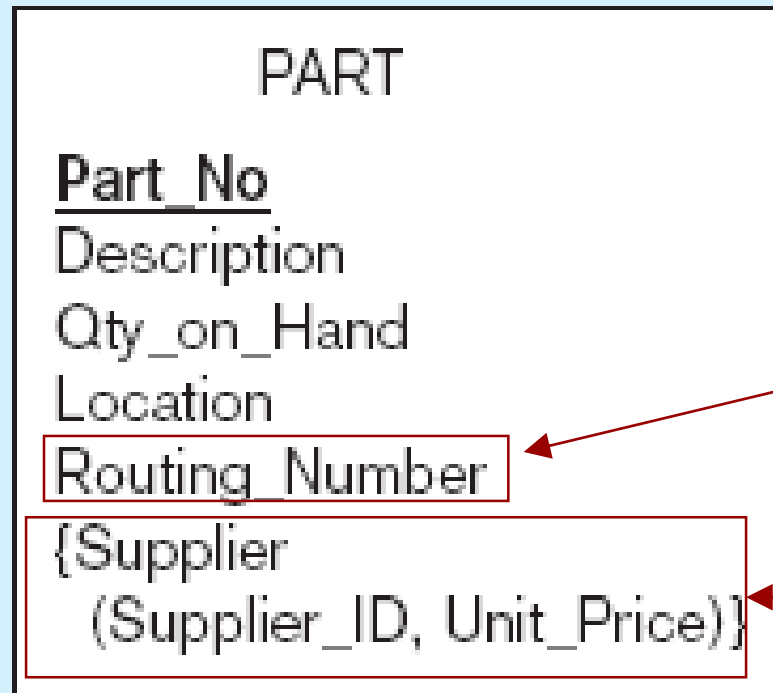

Motorcycle?

WAYNE STATE

Mike Ilitch School of Business

Specialization

Applies only to
manufactured parts

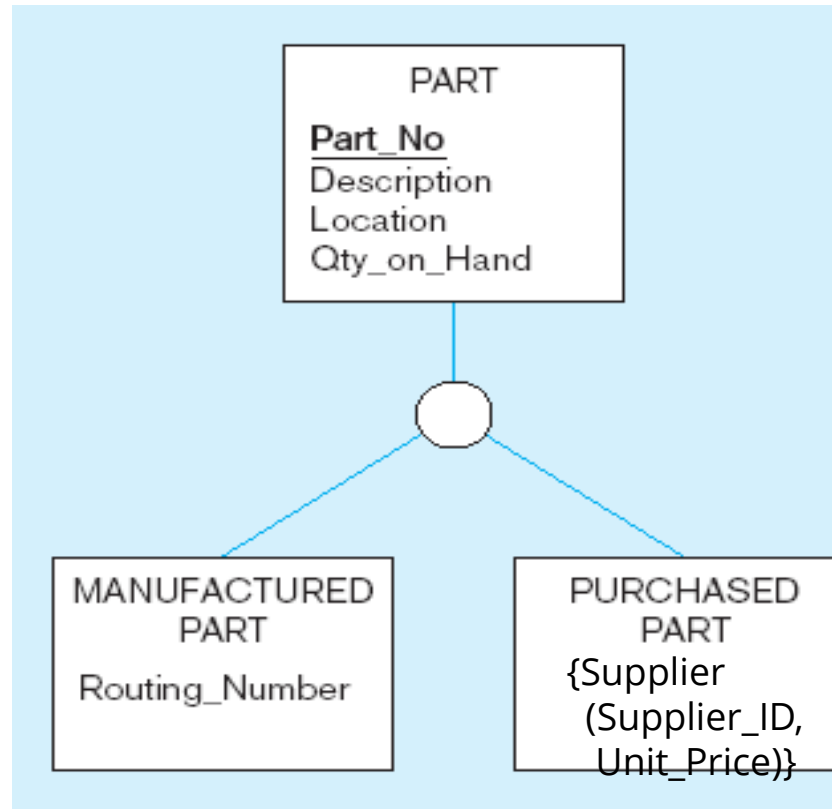

Applies only to purchased parts

WAYNE STATE

Mike Ilitch School of Business

Specialization (cont'd)

WAYNE STATE

Mike Ilitch School of Business

Wrap-Up

- Supertype/Subtype
- Generalization
- Specialization
